

# SafeNode Update Guide Linux

# Updating A SafeNode.

# Step 1 - Change to home folder

```
cd ~
```

# Step 2 - Stop old safecoind daemon

```
~/safecoin/src/safecoin-cli stop
```

# Step 3 - Delete old safecoin source code

```
rm -rf ~/safecoin
```

# Step 4 - Download safecoin source

```
cd ~ && git clone https://github.com/fair-exchange/safecoin --branch master --single-branch
```

# Step 5 - Change directory to safecoin source

```
cd safecoin
```

# Step 6 - Build safecoind from source

```
./zcutil/build.sh -j$(nproc)
```

# Step 7 - Start updated safecoin daemon

```
~/safecoin/src/safecoind
```
